Leading Manufacturer of Brass Inserts & Precision Turned Components

Reena Brass Industries was established in the year 1990 as manufacturer of Brass Inserts & Precision Turned Components. We are committed in our efforts to give you total satisfaction in terms of product and services. Over 30+ Years we have continuously upgrade our systems and technology to provide our customers with best quality at competitive rates. We give our customer excellent technical support through out the manufacturing process to ensure very best possible products.

We're in this business Since 1990 and we provide best quality components and services.

Industries We Serve

We serves a wide range of industries, We have adapted our services to suit a range of different industries. Some of the industries that we serve are mentioned below.

Agriculture

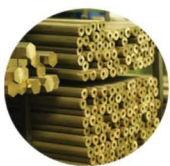

Automobile

Defence

Our Working Process

To accomplish our project goals, we follow very clear work process. Our skilled team members follows these steps to achieve desired goals and objectives.

Raw Material

Manufacturing

Quality Control

Packing

First step of production is to purchase raw material (Brass Rods) from our trusted suppliers. Material has to be purchased as per standard material grade.

Manufacturing process are likely to be threading, drilling, facing, milling and cutting. Expert engineers are responsible for checking quality of products.

After product produced, it has been send to QC Department. Quality Control Supervisor will check all dimensions and Measurements.

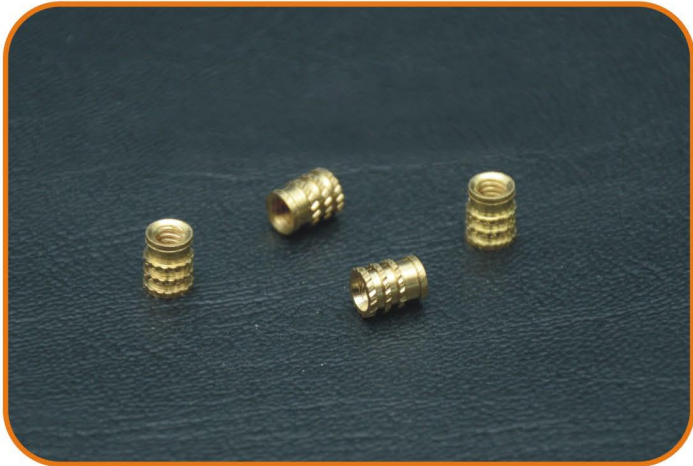

Each order is sent to packing unit. The completeness of whole order can be checked here optionally and than the whole order is dispatched.
